PERSONAL PROJECTS

Let's Empower ↗
- "Let's Empower" is a pioneering platform designed to empower women in the tech and entrepreneurship sectors. This initiative provides women with job opportunities spanning various domains, fostering financial stability. The platform also showcases success stories, offers informative resources, and encourages motivation, all contributing to a more inclusive and empowered community.

Find Homes ↗
- The "Find Homes" project showcases my dedication to leveraging technology to simplify everyday challenges. By combining advanced features like AI chatbots with comprehensive property information, the platform is a testament to my commitment to enhancing user experiences and making accommodation searches more convenient and efficient.

Trending Tales ↗
- Powered by a live news API and designed with HTML, CSS, and JavaScript, the website provide instant updates from reputable sources. Our sleek interface ensures a seamless, responsive experience across devices.
